

SERIES **HC** is a **Heavy wall extruded Convoluted** hose used extensively throughout the process industry. It's self cleaning design and unique way the hose can be lined through the fittings make a completely bug free environment for applications where cleanliness is paramount. Also, protects fittings against corrosion in applications transferring aggressive medias.

SERIES **HC - VW/SS/RC**, used globally in applications that require the up most cleanliness and with its heavier wall it is more suited to the arduous applications found in the process plant industry. The vacuum wire, SS 304 / 316 braid and EPDM Rubber Cover makes the hose much more rugged for harsh external environments.
