

Lantech
solutions

Manufacturers of flexible
hoses and couplings

About us

Lantech Solutions has a solid reputation for the design, manufacture, and supply of a comprehensive range of quality flexible hoses, couplings and allied products. Providing an effective solution to the pharmaceutical, chemical, petrochemical, food and drink, textile and manufacturing process industries.

We work with our customers to identify and evaluate the options available using a given set of criteria, before manufacturing a quality hose solution using industry standard, approved materials. This is combined with our dedication to fulfil our customers' requirements and an uncompromising commitment to deliver our products on time.

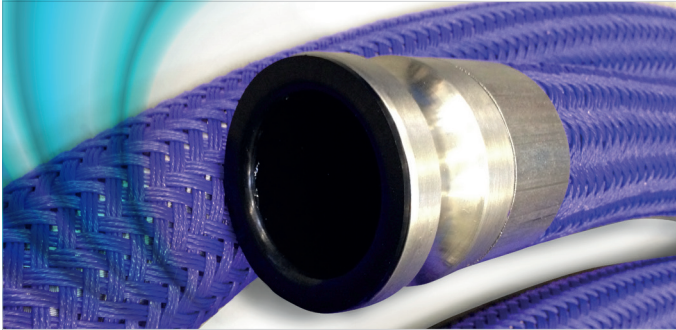

Our services

From specification to on-site hose testing and maintenance we can provide a comprehensive service package whatever industry you are in. Our services include:

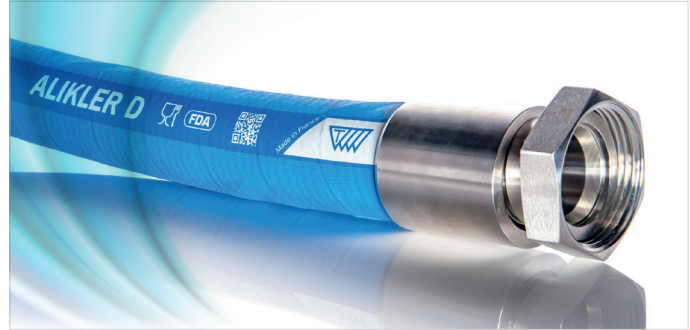

- On-site advice and consultancy
- Pre-site survey
- Installation advice
- Hose inspection and traceability

PTFE HOSES

At Lantech we supply and manufacture a comprehensive range of PTFE (Polytetrafluoroethylene) hoses and assembly products. These offer excellent insulation, a wide temperature range of -70°C to +260°C and can be offered as either smooth or convoluted bores.

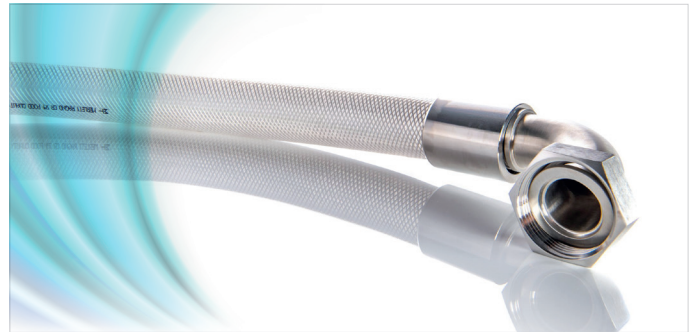

FOOD AND DRINK HOSES

Our extensive range of food and drink hoses allow the high pressure discharge of liquid food such as milk, beer, oil, fat, wine, cider, fruit juice and alcohol. Our range includes Citerdial, Lactadial, Alikler, Alikler D and Trelvin hoses.

CHEMICAL HOSES

Our chemical hoses allow suction and discharge of moderately corrosive chemicals: ketones, alcohols and acids. They are ideal for unloading bays on road and rail tankers and cargo vessels.

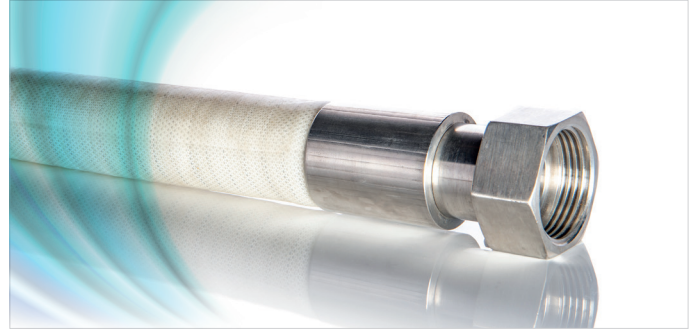

PVC HOSES

Our PVC hoses offer reliability at high working pressures. They are manufactured with a smooth bore and allow for excellent flow rates. They are suitable for industrial fluid handling in air and water lines, and are approved for contact with food and drink.

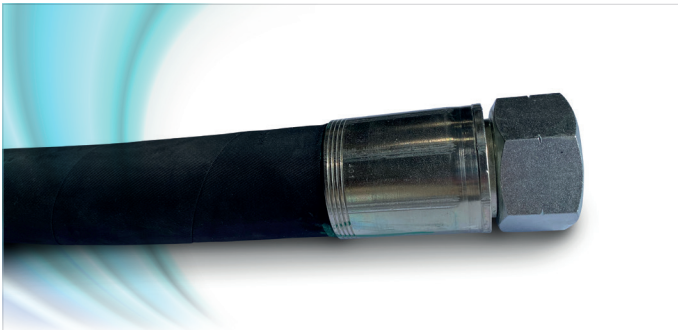

DUCTING HOSES

We manufacture and supply high-quality flexible ducting hoses for commercial and industrial applications. Our ducting is broadly used in dust collection, air, fume removal, severe service, lightweight material handling, high temperature hose applications, commercial vacuum, and lawn and leaf vacuum applications.

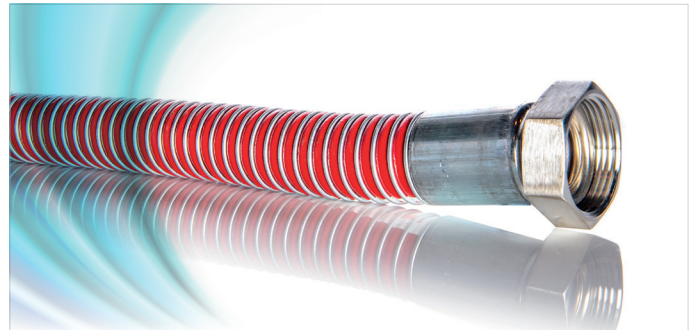

SILICONE HOSES

Our hygienic silicone hoses are suitable for the food, medical, pharmaceutical, beverage and dairy industries. They are available as tubing, braid reinforced or with 4 ply polyester reinforcement and 316 L Stainless Steel helix, and offer excellent flexibility and high standards of operational cleanliness.

INDUSTRIAL HOSES

Our robust industrial hoses are suitable for general industrial applications, including air, water, steam, chemicals, oils, fuels and many other liquids and gases. A range of materials and end fittings are available which include BSP, flanges, cam and groove.

COMPOSITE HOSES

At Lantech our composite style hoses are available in polypropylene or PTFE lined versions. This lightweight and flexible style of hose will handle a variety of chemicals and suit most transfer applications.

METALLIC HOSES

Our corrugated flexible metal hose is suitable for conveying all types of liquid and gases with extreme low and high temperature requirements. Corrugated Stainless Steel Braided Pressure Hose, to ISO 10380 specification.

HYGIENIC FITTINGS

We offer a complete range of fittings suitable for CIP Technology (clean in place) Supplied in 316 Stainless Steel in order to meet the specifications of the food, brewing, dairy and pharmaceutical industries. Other products include safety valves, non-return valves, flow control valves, plug cocks, sight glasses and ball valves.

FITTINGS

We have a complete range of fittings suitable for all applications. These include hygienic and camlock fittings, hose clamps, IBC fittings, dry break couplings, steam hose fittings, colder fittings and quick disconnects.

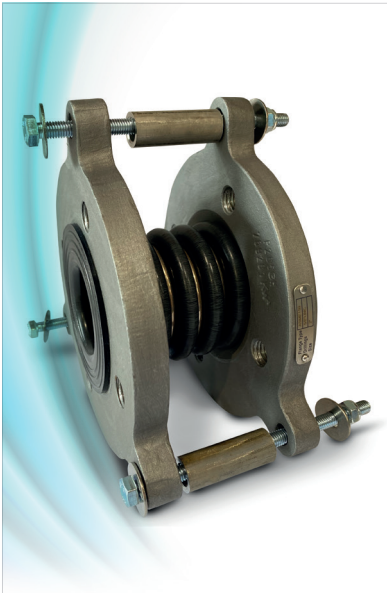

WASHDOWN EQUIPMENT

At Lantech we offer a range of washdown equipment suitable for most environments. These include the Biovast and a range of hose reels and washdown guns.

COUPLINGS

At Lantech we can provide an extensive range of couplings, for all applications. These include cam and groove, dry disconnect, quick release, IBC fittings along with many others.

BELLOWS

We provide a range of bellows, many of which are bespoke and made to order. Supplied in PTFE, stainless steel and rubber these can be used for all general and industrial applications, including water, steam and chemical to meet the specific needs of our clients.

We have built strong and valuable relationships with key suppliers and partners. With access to an exclusive range from local and global brands we can ensure a high quality product and service.
